DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 23-29, broadly drawn to the image reading device and the printing device individually having an image processing circuit that can be selected for processing image data according to specified specification;
- II (a). Claims 1-11, drawn to a control unit for discriminating specifications for processing of the printer, selecting one of the plurality of circuit arrangement information in accordance with the discriminated specifications for processing, and setting a circuit logic for the scanner based on the selected circuit arrangement, read on Figs. 1-9B (applicant's first embodiment);
- II (b). Claims 12-22, and 30-31 a control unit for discriminating specifications for processing of the scanner, selecting one of the plurality of circuit arrangement information in accordance with the discriminated specifications for processing, and setting a circuit logic for the printer based on the selected circuit arrangement, read on Figs. 12-19 (applicant's Third embodiment).
- 2. Inventions I, and II (a-b) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not

Art Unit: 2624

require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

3. Inventions II(a) and II(b) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above, requiring separate consideration and search, restriction for examination purposes as indicated is proper.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other inventions.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
